## Hymer product news: **Caravan Salon Duesseldorf 2023**

Hymer GmbH & Co. KG, the leading manufacturer of premium motorhomes and caravans, will be presenting several new products to the public at this year's Caravan Salon in Duesseldorf.

### **Free S Campus special edition: A camper van that combines adventure with comfort**

Hymer is launching a special edition of the Free S Campus this year, which stands for sportiness and comfort with its wide range of features and blue-grey exterior colour. Built on a Mercedes-Benz Sprinter chassis, the camper van boasts a powerful 170 hp engine, despite its compact length. Modern design accents on the exterior, such as special decals at the rear and on the side wall, as well as a pop-top roof containing a large double bed, combine adventurous camping holidays with comfort. Inside the camper van, comfort is ensured at all times thanks to the silver-grey furniture finish of the stylish furnishings combined with the "Jandia" fabric combination and white overhead locker doors. The 9-speed automatic transmission, electric parking brake, reversing camera and numerous driver assistance systems make it an even more comfortable ride. The new 200 x 122 cm pop-top roof with a double bed, 12V power connection and LED reading light with USB port guarantees home-from-home sleeping comfort, even when on the road.

To get you from one place to another quickly, the Hymer Free S Campus now comes with a powerful 170 hp engine and front-wheel drive as standard, as well as a compact vehicle length. The tried-and-tested, 9-speed automatic transmission, electric parking brake, reversing camera and numerous driver assistance systems make the camper van an even more comfortable ride.

### **Heading into the future with Hymer: Be even more self-sufficient on your travels with the Hymer ML-T**

Hymer is setting new standards in motorhoming with the Hymer ML-T and proves once again just how innovation-driven and far-sighted the long-established company is. The new model stands for comfortable travel with lots of style and no limits. Customers can choose between various premium style collections and design features, as well as an updated lighting concept. In the case of the “Velvet Ash” style collection, a dark wood has been used for the finish. Paired with the light wall coverings, the atmosphere created is warm and welcoming. The “Native Bamboo” style collection sets it apart from the Venture S at first glance: stylish bamboo accents really catch the eye. However, it is not only the stylish design of the new Hymer ML-T that is so impressive, so too are the optimised features for even greater self-sufficiency and freedom when travelling. Thanks to the new Smart Battery System 2.0, a generous 154-litre compressor refrigerator with double hinge and a diesel heater, you will have a sufficient power supply and be largely independent of gas on your travels. When it comes to digitalisation, the new Hymer ML-T also makes travel intuitive and comfortable thanks to the connectivity with the Hymer Connect app.

### **Maximum freedom: The new Grand Canyon S makes your camping dreams come true**

The new Grand Canyon S boasts new standards of self-sufficiency, comfort and connectivity. Inspired by the exclusive Hymer Venture S off-roader, the superior design, the choice between various style collections and the individually adjustable light temperature ensure that the camper van feels comfortable and homely inside.

Die The “Pearl Grey” style collection is characterised by overhead locker doors featuring an elegant oak finish and a bright, cosy furniture finish with a felt look on the walls. The “Ivy Green” furniture finish, on the other hand, is dominated by olive green furniture set against walls finished in a homely, decorative felt film. An improved installation concept makes self-sufficient travel a breeze: equipped with the lithium Smart Battery System, a long-lasting supply of electricity is guaranteed. The roof, cab, rear and sliding door are fitted with the best insulation, ensuring perfect hot air distribution. The Grand Canyon S is perfect for adventure lovers who want to get into camping, but who don’t have any experience of motorhoming: the simple vehicle controls using the Hymer Connect app make life easier for first-time campers. There is nothing standing in the way of self-sufficient adventures.

### **All set for a colourful journey back in time: The new Eriba Touring Colour Editions**

The Eriba Touring cult caravan range has a glorious new design: the traditional model with its characteristic, aerodynamic body shape, which has been in production since 1957, is now available in a choice of three bright colours. The “Nugget Gold”, “Tango Red” and “Harbour Blue” special editions combine the popular retro look of the vehicle with a modern twist – true to the Eriba slogan “Anything but ordinary”. The bright side walls, front and rear of the caravans create a fresh and elegant exterior, which is complemented by stainless steel bumpers, alloy rims and a chrome package as standard. Two new, spacious layouts, the 630 and 642, are also being added to the Touring range, which are perfect for families thanks to the abundance of storage space as well as up to five berths – with the optional pop-top roof. The Touring 630 and 642 offer the same level of comfort that you would expect from Touring models, plenty of storage space, a generous headroom and a low dead weight, making them the ideal companions for families. To ensure that the needs of all the cult caravan’s fans are met, the new colour special editions are available for every layout, from the compact Eriba Touring 310 to the spacious Touring 642.
